Syngenta Flowers Wholesale*

syngenta.flowers

Dear customer

At the moment of writing the introduction of our new catalogue, most countries are in a lockdown. Streets are empty and many people are worried about their health, their jobs, or the wellbeing of their loved ones.

I truly hope that, by the time you are reading this catalogue, your business has taken a turn for the better. We all have faced difficult moments, when markets were completely locked down and the joy of buying fresh flowers suddenly became inaccessible for consumers. Let's all hope this will soon be an image of the past.

Last year was a tough year in many markets, but now the time has come to find a new horizon.

A world without flowers is a sad world. Flowers are not just a luxury product - they bring happiness and joy to billions of people every day. Especially so in times when physical contact has become restrictive, the merriment of flowers in the

garden has become even more valuable. And in these times with social distancing, there has been a renewed appreciation for walking in parks and public gardens.

These gardens are beautified through your effort to bring our genetics to growers and consumers worldwide. Growers that nurture their plants and bring resilient, colourful, innovative flower products to the markets - for all to enjoy.

Because our industry deserves it, it is important that we work together at our very best to overcome the challenges that face us. Together we will come out stronger - so join me in savouring the fruits of our labour, in every park or garden where beautiful flowers grow.

I wish you a very successful season!

Juul van Loon

Snapkini

Antirrhinum majus

Grow your success with our Snapdragon.

This proven dwarf Snapdragon is distinct from other series by being the most day length neutral series in the market. Snapkini is replacing the well-known Montego series.

- Strong main stem.
- Very good basal branching.
- Available in a range of strong colors.

topspin^o
The right begonia. Always.

YOUR BENEFIT

Topspin's innovative cold tolerance lets you **plan and produce more efficiently**, while **reducing waste at the same time**. That's how you save time, money and effort.
Worry-free production – that's our promise.

Bada Bing

Begonia semperflorens

Perfect for main season sales.

Bada Bing (Green leaved) and Bada Boom (Bronze leaved) are both very early, uniform series for use in packs and small pots.

- Garden performance great in sun and shade.
- Strong germination and seedling vigor to optimize production from sow to finish.
- Very early flowering with a narrow bloom window for quick turns and bench-run production.
- Compact, well-branched plants ideally sized for high-density production in packs and small pots.

Cora XDR

Catharanthus roseus (Vinca)

The vinca that fights back!

Easier to grow: improved branching, uniformity, and flower-power ideal for premium packs and small to larger pots.

- Reduced risk: offers season-long flowering and survival in landscape plantings.¹
- This vinca is powered by high levels of resistance to multiple strains of aerial Phytophthora.
- Higher consumer appeal: large showy flowers in the widest range of solid and high demand bicolor patterns of any disease resistant vinca on the market.

¹Highly resistant to ten of the most virulent isolates of Phytophthora nicotianae that cause Phytophthora blight on annual vinca (Confirmed in collaboration with Clemson University; These isolates were found at growers and in landscapes across the southern U.S.)

Elizandro Fiorese - Director of Agrofior Produção de Mudas Ltda, located in Colombo, Paraná, Brazil

We started growing Vinca Cora as soon as it was launched in Brazil. The emergence of Vinca Cora and later Vinca Cora XDR, was a major breakthrough within the flower varieties we work with, as we were able to have a quality product, and especially to have product availability at times we didn't have before, due to the resistance to diseases. Cora XDR has a greater range of resistance to variations of Phytophthora, a pathogen that has always been a limiter in the production of Vinca in our region.

Before, it was very difficult to serve our Vinca customers at certain periods of the year due to the high incidence of this fungus, which was difficult to control. After the launch of Vinca Cora and finally Cora XDR, this was overcome.

In addition, this product has other qualities such as larger flowers, new colors, excellent germination and uniformity of plants. We are very pleased with this product and recommend it.

Cora

Catharanthus roseus (Vinca)

Rockin' red.

Still the only true-red vinca on the market with resistance to aerial Phytophthora.

- Worldwide proven aerial Phytophthora tolerance makes this large flowering unique hybrid the 1st choice in the sun!
- Grow as a core color to round out the upgraded Cora XDR range.

Cora Classic Red 70035155

Cora Cascade

Catharanthus roseus (Vinca)

There's none other like it.

F1 hybrid uniformity and vigor build a premium package not found in other trailing vinca.

- The only trailing vinca powered by high levels of resistance to multiple strains of aerial Phytophthora.
- The mounded, spreading habit is ideal for summer baskets, mixed containers, and large landscape beds.
- Large, high-quality flowers completely cover plants creating blankets of color lasting all season long.

Diabunda

Dianthus x barbatus

A bounty of bicolors.

A compact Sweet William type that is programmable with uniform habits and timing for easy, efficient production in packs or in pots.

- Faster and easier to flower for early-spring and fall sales compared to traditional Dianthus barbatus.
- Striking colors, including bicolors make these familiar flowers a hit at retail.

Nastya Nikolaeva, Egor'evskiy, Russia

We have been growing Gazania Kiss for a long time. It fits well in our production program. Plants from this series are easy to grow and perfect for pack production. All colors in the series bloom almost simultaneously, which makes it easy to send them to our large retail chains Auchan, Castorama, OBI.

The retail-ready plants of Gazania Kiss are not only very elegant, they are also resistant to drought and heat, Moreover, they tolerate the first frost well, which is very important for our customers.

Kiss

Gazania rigens

Bring a Kiss of joy to your world.

Multiple large blooms on tightly upright plants work perfectly in a premium quality program.

- Very uniform between all colors, making production more efficient and easy.
- Perfect for larger packs and smaller pots.

Big Kiss

Gazania rigens

Super-sized flowers on vigorous plants.

Huge, striking 12 cm blooms held en masse above attractive foliage make a striking display on the retail bench or in the garden.

- Full, bushy habits easily fill large containers.
- This heat-loving, drought tolerant beauty creates a dependable product to extend the season for premium retail sales.

Yellow Flame Imp. 70041321

White Flame Imp 70045993

Frosty Kiss

Gazania rigens

There is nothing cold about this Kiss.

Frosty Kiss is the earliest flowering, most uniform series with silver leaves on the market. Suitable for 9 to 12 cm pots with a nice contrast between flower and leaf color.

- Silver foliage companion to Kiss series, provides additional retail and garden interest even when flowers are closed.
- Earlier and more uniform flowering than other Gazania series with silver leaves for easier and more economical production.

Gazoo

Gazania rigens

If you like it big: Gazoo.

Gazoo distinguishes itself from other Gazanias with very large flowers, 12-14 cm across, strong flower stems and a vigorous plant habit. The flowers open up under lower light conditions, showing exceptionally strong color for a long period.

- A lower cost, open pollinated alternative to hybrid Gazanias.
- Distinctive extra large flowers on vigorous plants are ideal for large, showy pots.
- An assortment of unique, clear color flowers, plus those with traditional rings, make a compelling retail offer.

Vladimir Prazdnikov, Gorky Park, Russia

Sunfinity is really something special! It looks very different compared to the other annuals, and we like it very much. I would like to notice its flexibility in a greenhouse and outside. But also, the incredible growing and flowering power are truly stunning. This interspecific hybrid has a good uniformity in all stages, which is very important for the agronomists and landscape designers.

We are able to grow the magnificent plants up to 1,5 meters high and one meter wide, without using PGRs. All plants were covered with eye-catching yellow flowers. The flowering period is very long so the Gorky Park and Muzeon visitors can enjoy this vigorous and bright beauty for many weeks.

Sunfinity Yellow Dark Center 70052829

Sunfinity

Helianthus annuus

Endless Blooms. All Season Long.

The next generation of sunflower offers nonstop blooming and continuous flowers all season long. This facultative long day plant with fast crop times is well suited for late spring and early summer.

- Extends the retail season with a premium product offer, ideal in 20 cm and larger containers for landscape use or in larger patio pots.
- Provides extended shelf-life compared to short-lived regular pot sunflowers that cannot be sold after first flower.
- Multi-blooming plants allow home gardeners the opportunity to cut and enjoy flowers indoors as well as in the garden.
- Complete branding package available to support and drive retail sales.

Not available for European Wholesale.

Starshine

Laurentia axillaris

Intergalactic flower power.

A great alternative to cutting varieties with a rounded and mounded habit.

- Starshine works ideal in baskets or as a component in premium mixed containers.
- Unlike many other Laurentia, Starshine creates well branched plants that flower without the need for long days.
- This unique, early-season annual offers a touch of blue to the retail assortment and exhibits very good heat tolerance.

Pinto Premium

Pelargonium x hortorum

The market leading seed geranium... with good reason!

Well-branched, vigorous plants adapt easily to high density production in small pots, yet have outstanding garden vigor.

- Very uniform and early flowering simplifies planning and production to reliably target spring promotions.
- Large, high quality flowers on short stems are easier to ship and have high impact at retail.
- Offered in a broad assortment of vibrant colors and novelty patterns.
- Pinto Premium White to Rose has won the All-America Selections award for performance in North American trials.
- The variety was also awarded with a Fleuroselect Gold Medal, having obtained one of the highest scores ever achieved in the Fleuroselect pack trials including a 1.89 out of a possible 2.0 points for innovation.

Hurrah

Petunia multiflora

The fan favorite.

Hurrah Petunias are the F1 hybrid multifloras with the grandiflora attitude! Their earliness, tight bloom window and uniformity provide the ease you need in Petunia production. All colors in the series bloom within 3 to 5 days, so they can be shipped at once. Hurrah displays an excellent garden performance and a fast recovery from rain.

- Long-time, favorite standard, multiflora Petunia for early season blooms and long-lasting garden performance.
- Early and uniform flowering window even under low light conditions for easy scheduling and shipping.
- Fills garden beds fast with vigorous, mounded plants covered with medium size blooms.

Damask

Petunia multiflora

Tough as nails.

Bred for high-density production in packs and small pots with little-to-no PGRs. Naturally compact, non-stretching plants offer extended shelf life and are easy to ship and merchandise on racks.

- Early, uniform, and free-flowering plants finish fast even under the short days of early spring.
- Tidy plants have excellent weather tolerance and deliver season-long garden performance.

Picobella

Petunia milliflora

Pretty and petite.

Uniquely miniature flowers offer a special addition to the Spring retail mix. Easy and economical to grow, delivering high color impact in borders, beds and mixed containers.

- Miniature flowers and petite plants offer a unique addition to the spring retail mix.
- Easy and economical to grow - extra early flowering with no special growing regime required and no need for PGRs.
- Perfect for small borders, beds, and mixed containers - strong vigor but won't overgrow companion plants.

FlashForward

Petunia milliflora

Plays well alone and with others.

A miniature flowering, spreading Petunia perfectly suited for basket, mixed container, and premium pack programs. Flashforward replaces the Picobella Cascade series.

- Less day length sensitivity provides extra early flowering in 9-10 weeks from planting, even under short day conditions.
- Tidy plants hold longer at retail than traditional trailing Petunias and don't overgrow companions in mixed containers.
- Extremely free flowering all summer long even under difficult garden and weather conditions.

Queen of Sunlight

Sanvitalia speciosa

Exceptional uniformity and compactness from seed.

Heavily branching, uniform and compact with masses of flowers make this seed raised Sanvitalia a true alternative to cuttings.

- Easy to produce in small pots, at high densities, or as a premium hanging basket.
- Makes an excellent addition for mixed combinations or for use as a cheerful patio plant.
- For best and most uniform pot fill: use 3 seeds per plug.

Antigua

Tagetes erecta

The trusted choice for bedding and borders.

Antigua is early, uniform and compact and therefore ideal for high density cultures. Less day-length sensitivity makes Antigua easy to schedule and grow.

- Less day-length sensitivity makes Antigua a programmable, easy-to-grow marigold for early spring shipping.
- Naturally dwarf and branching plants are ideal for large packs and small pots and fit perfectly on racks with little to no PGRs required.
- Strong flower stems support beautifully rounded 7 cm blooms that hold up well in shipping and the garden.

Inca II

Tagetes erecta

Long or short days, Inca II delivers.

Inca II is an intermediate type Marigold with very early flowering and less day length sensitivity. It achieves a medium height in the garden and performs well even in hot conditions.

- Well-branched plants with large double blooms meet the market demand for showy, retail-ready containers.
- Early flowering, even under increasing day lengths, make Inca II easily adaptable for both early or late spring production.
- An outstanding choice for color and fill in sunny landscape applications.

Obsession

Verbena Hybrida

Color that will mesmerize.

Obsession has a compact and branched habit ideal for high density production and shipping. It is early, uniform, multi-branching and very floriferous. Its wide range of colors including 'eyed' varieties attract impulse sales, and its strong tolerance to powdery mildew helps ensure consumer satisfaction.

- Perfect for packs and small pots with strong branching and high uniformity that make production a breeze.
- Very early with fast follow-up flowering, so plants stay in bloom longer
- Available in unique twister patterns previously found only in cuttings and a wide range of other bold colors and top notch mixes.

Obsession Cascade

Verbena Hybrida

First and only trailing Verbena from seed.

Obsession Cascade is a new class of seed verbena with a spreading and mounded habit ideal for automated production in large packs and small pots, for landscape use, or for high volume retail promotions in single crop or combination baskets. Plants are well branched, requiring no pinch.

- Bred to be very tolerant to Powdery Mildew, Obsession Cascade will continue to perform and flower in the garden well after many other varieties have succumbed to disease.
- Seed product form offers easy, no-pinch production with all the efficiencies that come with mechanized handling of seed grown plants.
- Ideal for value added baskets and combinations.
- Excellent powdery mildew tolerance.

Shalaturkina Olga, SC Edem, Russia

Schizanthus is one of our most favorite pot plants. We order the Atlantis hybrid every year, and it is always a success with our customers. Agronomists love it for easy growing, good seed quality, and its joyful appearance. It's such a beauty!

The openwork foliage and bright colors delight both us and our customers. Clients come to us specially for it and know that the plants quality will be excellent.

Atlantis

Schizanthus x wisetonensis

The butterfly flower.

Atlantis is an ideal spring pot plant. This variety easily produces compact, well-branched uniform flowering plants. Pot sizes from 11-14 cm can be used and optimum quality will be obtained with a cool culture.

- Atlantis is less day length sensitive, which means it can easily be brought to flower much earlier in the season than other varieties without stretching the plants.
- Flowering time: January-May

Not available for European Wholesale.

Primera

Primula acaulis

First of the season.

Primera is bred for exceptionally short production under almost any circumstances for sales from September through February!

- Bred for early production from September through February, but can also be slotted through the entire primrose season.
- Minimal cool temperatures required to initiate flowering.
- Uniform plants and flowering, with large showy blooms. Compact habit fill pots with tidy, rounded leaves.

Bademler Tarımsal Kalkınma Kooperatifi - Gülsevım Özdek, Urla/İzmir, Turkey.

This serie provides easy growing plants. It has a strong plant habit. There are no any losses or disease problems during production stage. The variety of colors makes Maché very special. And also the beautiful leaf type and the semi-dwarf growing habit are other positive features I really like about Mache.

Maché

Ranunculus asiaticus

Stimulate early spring sales with this irresistible cool crop.

Vigorous plants have brightly colored, fully double flowers.

- Ideal for 11 cm and larger premium containers.
- Easy to grow and manage with strong uniformity and high responsiveness to PGRs.
- Possible to force into flower to start the season earlier.

Viola at-a-glance

	Special notes
Penny	World's best-selling standard type Viola
Deltini	Extremely uniform
Endurio	Unique trailing Viola with strong winter hardiness
Delta	Large flowered with non-stretching plant habit
Delta Speedy	Reliable uniform performance under short days
Fino	Large flowered with non-stretching habit
Karma	Large flowered, unique colors
Colossus	Giant flowered with non-stretching plant habit
Mammoth	Giant flowered with strong plant vigor
Wonderfall	Trailing Pansy with medium-large flowers

Penny

Viola cornuta

Thoughtful growers grow Penny.

Penny is the world's best-selling viola series due to its versatility and compact, branching habit, producing multitudes of cheerful flowers. It also excels in the garden where its strong root system provides superb overwintering performance.

- Early flowering and uniformity across a wide range of colors make Penny suited for high density production in packs and small pots for both autumn and spring.
- Tightly branched and non-stretching habit under warm conditions offers longer shelflife and reduces the need for PGRs.
- A multitude of flowers creates long-lasting landscape displays, and a strong root system ensures reliable overwintering performance.

Deltini

Viola cornuta

Covered with color when you need it most!

The Deltini series is the most programmable Viola series due to its day length neutrality and high level of uniformity in plant habit and earliness under different environmental conditions. It flowers very easily and early even under short days, making it ideally suited for spring production.

- Efficient to produce with reliably fast crop times and a 4-day bloom window between colors, even under short-day conditions.
- Its non-stretching and basal branching habit is perfect for 8-10 cm pots and packs.
- Mutliflora type: Plants are covered with masses of flowers, slightly smaller in size than Penny.

Delta Pansies

Buen Retiro garden, Madrid

“

Carmen Lázaro Muñoz from Acciona, Spain

We oversee landscaping in Madrid and to flower that beautiful capital we have used Delta® for many years. We chose that genetic because its strong and well branching. It is continuously flowering from October till March, even in frost and low light days conditions. And if you look at pansies close to Madrid, you will find them very easily, as growers have confidence in this variety.

Delta White with Blotch 70058884

Delta®

Viola x wittrockiana

The number 1 pansy in the world!

Strong uniformity in vigor between all the colors in the series and early flowering with a tight bloom window distinguish Delta from the competition.

- The Delta series is ideal for production in 9-11 cm pots and packs.
- Matched for timing, compactness and flower size.
- Non-stretching habit gives Delta the best shelflife.

Not available for European Wholesale.

Delta[®] Speedy

Viola x wittrockiana

Color when you need it most.

Delta Speedy is the most day length neutral Pansy on the market. A reliable uniform performance under short days makes this the best choice for growers that want to sell the plants very early in the season.

- Like the rest of the Delta assortment, plants sport masses of large, upward facing blooms with strong weather tolerance for long lasting retail and garden displays.

Régis Benoist from EARL Benoist Horticulture, France

Our company was created in 1913 by my great-grandfather with a major focus on Pelargonium. We have produced pansies for 30 years and always used Delta® from the beginning with a great success.

We are looking for a product that flowers well in short days, with a good shelf life and easy to prepare. This is not the case for all other series in the market. In fact, next year, we plan to increase the amount of improved single colors in our planning.

Delta

Colossus

Viola x wittrockiana

Heat and humidity, meet Colossus.

The Colossus series has been bred to produce giant flowers on short, sturdy stems, even under warm growing conditions, typical in early autumn and late spring production.

- Colossus can be produced in both packs and 9-11 cm pots.
- Tight, non-stretching habit developed specifically for high-density production requiring fewer PGRs, well-suited for late summer/early fall markets.
- Extra large blooms stand up to heat stress with less stretch to create consumer appeal even under hot and humid conditions.
- Fast turns, lower production costs, increased shipping efficiencies and a long shelf-life... What's not to love about Colossus?

Wonderfall

Viola x wittrockiana

When size matters.

Wonderfall is the first large flowered Pansy with a truly trailing habit. With its extra vigor, plants fill pots quickly and are ideal for large containers and balcony plantings.

- In the landscape, its spreading habit covers more ground than traditional pansies and provides maximum color impact.
- Wonderfall is suitable for 12 cm pots and larger and especially hanging baskets and window boxes.

Rose Delight

Arabis blepharophylla

Great season starter for retail.

An excellent early season perennial for cooler climates. Bright deep rose blooms are held on compact habits suitable for quarts and small pots. A great choice for adding color and novelty to early spring programs.

- Real impulse article that stands out for uniformity, earliness and intensity of the color.
- Advice: use 2 seeds per plug in a 288 tray.

Rose Delight 70003153

Germ. rate	Product form	Pot size	PGR	Crop time after potting	Finished plant shipping month	Plant height	Habit	Exposure	Winter hard. zone

Little Treasure

Arabis caucasica

Beat the snow with color.

A well-matched and uniform series simplifies production and shipping. A bright white and an intense deep rose add wow to early sales windows.

- Little Treasure has improved uniformity and earliness, that makes it an excellent item for large scale production and retail actions in early spring.
- Advice: use 4 seeds per plug in a 288 tray.
- Plants are vigorous, do not pot too early.

Kirigami

Aquilegia caerulea

Flowering when you want it.

Truly programmable like an annual with minimal vernalization requirements.

- Bright colors and upward-facing blooms improve retail impact. Highly uniform across all colors, an ideal grower-friendly series.
- Kirigami creates a revolution in Aquilegia-land: the first series that can be forced into flower at any moment in early spring.
- Flower induction starts already at temperatures below 13C. Plants can be forced to flower at higher temperatures after vernalization period. Use 1 seed/plug for smaller pots and 3 seeds/plug for larger pots.
- Vivid colors, large flowers that are all facing and healthy leaves.

Kirigami Red & White 70059721 & Deep Blue & White 70059727

Armada

Armeria maritima

A grass with beautiful flowers.

Real impulse article that stands out for uniformity, earliness and intensity of the color. Great season starter for retail.

- Up to 2 weeks earlier flowering than traditional varieties.
- Vernalization is beneficial for a high number of flower clusters.
- Advice: use 4 seeds per plug in a 288 tray.

Blizzard

Arenaria montana

The evergreen with large white flowers.

Blizzard is the most uniform version of the traditional Arenaria. The Blizzard Compact is a breeding breakthrough: flowering up to 2 weeks earlier with a much more compact and controlled habit, but still with the same large pure white flowers.

- Compact habit means no PGR need and much easier to grow a nice quality plant.
- Early flowering makes the Blizzard Compact matching many other Spring flowering perennials.
- Advice: use 4 seeds per plug in a 288 tray.

Audrey

Aubrieta Hybrida

Audrey stays in shape.

The first F1 hybrid Aubrieta from seed provides uniformity in habit and flower color. One of the earliest blooming perennials. Great for jump starting early spring sales.

- Vigorous, but still compact plants for easy production.
- Very uniform F1 hybrid quality.
- Advice: use 4 seeds per plug in a 288 tray.

Audrey Light Blue 70017947

Summit

Aurinia saxatilis (Alyssum)

Yellow in Spring.

Compact plants with grey-green foliage are covered in bright yellow blooms.

- Ideal for small containers for early spring programs.
- Compact and uniform plants give an abundance of blooms for great impulse appeal in the early Spring.
- Advice: use 3 seeds per plug in a 288 tray.

Shoeshine

Bergenia cordifolia

Tough foliage all year round.

Short flower stems, compact growth and triple as much branching than the traditional varieties make this variety the first choice for professional Perennial growers.

- Early flowering with short flower stems for more efficient production.
- Less sensitive for physiological leaf spots.
- Advice: use 4 seeds per plug in a 288 tray.

Pristar

Campanula carpatica

Early and star shaped.

First year flowering series with extra large flowers, vigorous plants and best earliness. Programmable for flowering from June to early August.

- The earliest flowering Campanula carpatica available.
- A perfectly matched series makes Pristar the go-to choice for small to medium-sized containers.
- Advice: use 3 seeds per plug in a 288 tray.

Earlion

Campanula persicifolia

Early flowering garden contrast.

Early and uniform flowering. Brings height in the garden.

- No vernalization need makes this the only reliable and uniform flowering variety in the market.
- Please note: each seed lot will have around 10% white flowering plants with the same habit and earliness as the blue. We advise to sell this as a mix.
- For separate colors: sow 1 seed per plug. For mixes: sow 3-4 seeds per plug.

Not available for European Wholesale.

Cyberia

Cyclamen coum

Cute flowering shade lover.

Finally a Cyclamen coum series available in separate colors and with a choice of flowering season. Very winter hardy and flowering in the late Autumn and in early Spring. Great impulse item, 'botanical' or 'natural' appearance.

- Short leaf-stems, making nice round shaped plants that stay within the edge of the pot.
- Can be planned for Autumn flowering (early sowing) or winter-spring flowering (later sowing).
- Advice: 1 seed per plug, grow in the shade, so not grow too dry.

Excalibur

Delphinium elatum

Stand out with excellent shape.

Excalibur has sturdy flower stems in combination with well developed flower panicles. The strong flower color remains stable. The plants are well branched and make an excellent shaped plant.

- Strong, densely packed flower stems give a great sales appeal.
- Highly suitable for cultivation in larger pots and containers. Great for overwintering, resulting in earlier flowering.
- Advice: use 4-6 seeds per plug in a 128 tray.

Prairie Splendor Compact

Echinacea purpurea

Easy growing popular prairie plants.

Prairie Splendor consists of 2 types. The traditional Prairie Splendor, which is medium tall and well branching and the new Prairie Splendor Compact.

- The Compact types are very well branching, showing many flowers and have a much shorter culture time than other compact varieties.
- Compact and very well branching for more plants per m² and more flowers.
- Much easier to handle than the tissue culture varieties.
- Attracts bees and butterflies.
- Advice: use 3 - 4 seeds/plug.

Canaries

Erysimum hybridum

Yellow means early spring.

A real 'must have' item for all perennial growers and retailers that want to start the sales season in early Spring.

- Great shelf life as the plants do not stretch like other *Erysimum* varieties.
- This very early flowering *Erysimum* is one of the first crops to show color.
- Ideal to use in mixed containers.
- Advice: use 2 seeds per plug in a 288 tray.

Canaries Yellow 70003599

Tahoe

Iberis sempervirens

Tough in the winter.

Tahoe is an excellent, early and uniform Iberis selection for high quality pot production.

- Tahoe is compact, well branched and has short flower stems.
- It is free flowering with very long lasting flowers, leading to an eye-catching amount of white in the garden.
- Starting from seed makes planning easier and saves costs.
- Most uniform and early seed selection for efficient production.
- Advice: use 3 seeds/plug in a 288 tray.

Scent

Lavandula angustifolia

The Lavandula innovation.

This first-year flowering Lavandula has a very compact and uniform habit. The attractive flowers make this unique product an ideal item for the impulse market. This series performs extremely well in balcony and patio containers and its sweet aroma will add to its impulse value. It can also be used as a bedding plant in the garden.

- Blue Scent is advised to use for late summer flowering. Blue Scent Early performs best for Spring and Summer flowering in a very short production cycle.
- Blue Scent Early is more vigorous than Blue Scent and has a similar habit as White Scent early.
- This series does not need vernalization and therefore it will flower from June till October.
- Advice: use 4 or 8 seeds per plug, depending on the final pot size.

Spring Fever

Papaver nudicaule

The multi-flower poppy.

Spring Fever is a very uniform and free flowering selection. It is one of the earliest Papavers on the market and is suitable for Spring and Summer flowering sales.

- Spring Fever produces masses of short, stable flower stems bearing mid-sized flowers.
- Day length neutral for flexible production planning. Can also be used for early flowering in overwintering culture.
- Advice: use 4 seeds/plug in a 288 tray.

Arabesque

Penstemon hartwegii

Tall and colorful

Good branching uniform F1 Penstemon from seed for the impulse market in larger (15-19 cm) pots.

- Great alternative for the taller, expensive vegetative types.
- Available in 5 matching distinct colors.
- Advice: ship when 1st flower is open, to avoid issues with flower drop.

Partybells

Penstemon hartwegii

A compact party.

Partybells is the first and only genetic compact Penstemon, offering compact, well branching plants, in strong colors, ideal for impulse sales.

- No need for PGR's, easy to cultivate.
- Great impulse item, loved by consumers.
- Advice: ship when 1st flower is open, to avoid issues with flower drop.

Twinkle

Platycodon grandiflorus

A patio-pot lover.

Improved branching, more free flowering and a shorter culture time are the main features of this new Platycodon series.

- Better branching than any other series, resulting in more buds and flowers.
 - Can be used as a patio pot item or as traditional perennial.
- Not available for European Wholesale.

Corolla

Primula denticulata

A ball shaped spring surprise.

This very early flowering series is especially bred for indoor culture in cold tunnels. It is very early flowering and can be forced to flower by heating up the greenhouse.

- The ball shaped flower heads appear in large quantities resulting in a long flowering period.
- Very early flowering and possibility to force flowering, making sales timing easier.
- The earlier you sow, the more flowers will be developed after the vernalization in winter.
- Advice: use 2 seeds/plug in a 288 tray and sow already in June.

Rosy

Primula rosea

Sweet like candy

The most uniform, but especially the most vigorous growing Primula rosea on the market. The plant vigour results in many more flowers with a very strong rose color in early Spring.

- Strong vigor for a better pot fill in spring. The earlier you sow, the more flowers will be developed after the vernalization in winter.
- Advice: use 4 seeds/plug in a 288 tray and sow already in June.

Cabrillo

Primula veris

Spring arrived.

Very early true Primula veris with surprising compact habit for pot size 10-14 cm.

- Much more compact habit, especially resulting in smaller leaves, so more efficient use of production space.
- The compact leaves give a much better shelf life at retail.
- Advice: use 2 seeds/plug in a 288 tray.

Icecube

Pritzelago alpina

The perennial Alyssum.

Icecube is a very uniform and early selection. Icecube flowers early in Spring. The flowering of all single Icecube plants starts simultaneously and results in an excellent pot performance. Icecube is extremely free flowering and has a long flowering window in the garden.

- Very uniform in earliness and plant habit.
- Reliable variety with good weather resistance.
- Advice: use 4-6 seeds/plug in a 288 tray.

Pinwheel

Pulsatilla vulgaris

The rock garden favorite.

Real rock garden plant with extra number of flowers thanks to the increased plant vigour. Flowers are much more looking upwards than traditional varieties, giving a great look into the yellow center of the flowers.

- Vigorous plants that produce more flowers than traditional varieties.
- The earlier you sow, the more flowers will be developed after the vernalization in winter.
- Advice: use 4-6 seeds/plug in a 288 tray and sow in June.

Merleau

Salvia x superba

The matching series.

Compact, very well branching, early Salvia suitable for pot size 12-17 cm.

- The 3 colors match in earliness and habit and can be combined in 1 large container.
- More compact than the Bordeaux series for efficient mass market production.
- Advice: use 2 seeds per plug in a 288 tray.

Highlander

Saxifraga x arendsii

The seed alternative.

Saxifraga is one of the most important spring-flowering perennials. Highlander is early flowering and provides a good uniformity, a compact habit, short and stable flower stems and an enormous quantity of flowers.

- Seed variety with a good uniformity for the P9 production or mass market retail actions.
- Available in 3 shading colors.

Lofty

Saxifraga x arendsii

The next generation.

Lofty is the next generation of seed propagated Saxifraga. Much larger flowers, more vigorous plants and an increased uniformity make this the best low cost alternative for the vegetative series.

- Early flowering and very large showy flowers.
- Vigorous plants that fill up the pot easily.

Silver Frost

Sedum nevii

Foliage color in the garden.

Seed raised Sedum with silver blue foliage and many small white flowers. A first year flowering tender perennial giving a year round nice color appearance in the rock garden.

- Easy to produce with a controlled habit.
- Attractive foliage color, in the period that Silver Frost has no flowers.
- Advice: use 2 seeds per plug in a 288 tray.

Solarity

Sedum spurium

Colorful groundcover.

First highly uniform Sedum spurium from seed. Short crop time, well branching and easy filling 12-14 cm pots for late Summer and Autumn sales.

- Compact plants with very good shelf life.
- Short side shoots, which makes the plant less sensitive for breaking branches.
- Advice: use 3 seeds per plug in a 288 tray.

Seastar

Sedum pulchellum

Like a seastar.

Sea Star is a first year flowering perennial with unique sea star shape inflorescence.

- Many bright rose flowers in Summer that are grouped together in the shape of a Seastar.
- Suitable for pot cultivation.
- Advice: use 4 seeds per plug in a 288 tray.

Surrender

Sedum telephium

Autumn flowering sedum

First highly uniform S. telephium from seed. The compact and well-branching plants with the bright color, short culture time and low input costs make this perennial even more attractive for growers and retailers.

- Seed raised telephium with nice light green foliage and strong deep rose colored flowers.
- Advice: Use 3 seeds per plug in a 288 cell tray.

General Conditions of Sale

Syngenta Seeds B.V.

These conditions apply to every offer and every agreement between Syngenta Seeds B.V. and a buyer, insofar as the parties have not explicitly deviated from one or more of these conditions.

1. Definitions

For the purposes of these General Conditions of Sale, the following terms shall have the following meaning:

"Affiliate" means, in relation to either Party, a company which controls, is controlled by, or is under common control with that Party. For purposes of this definition, "control" means possession, directly or indirectly, of at least fifty percent (50%) of the voting equity of another entity (or other comparable interest for an entity other than a corporation), or the power to direct or cause the direction of the management or policies of an entity whether through ownership of securities, by contract or otherwise.

"Buyer" means the person or company whose order for the Products is accepted by Syngenta.

"Change of Control" means the event that a legal entity not being the Buyer or a Buyer's Affiliate, acquires or otherwise becomes able to Control the Buyer.

"Conditions" means the standard conditions of sale set out in this document.

"Contract" means the contract for the purchase and sale of the Products made between Syngenta and the Buyer.

"Delivery" means the shipment FCA (Incoterms 2010) from Syngenta's premises to the agreed delivery point, unless otherwise provided in the Contract. In case no delivery point has been agreed, Syngenta is entitled to nominate the delivery point. Delivery to plant raisers in the Netherlands shall take place postage paid, except for urgent and/or express delivery in which case the shipment costs shall be for the Buyer's account.

"Insolvency Event" means, in relation to the Buyer, any of the following circumstances: (i) if it is unable to pay its debts as they fall due or is declared bankrupt, (ii) if it ceases or threatens to cease carrying on all or substantially all of its business, otherwise than for the purposes of a solvent reconstruction or amalgamation, (iii) if any liquidator, receiver, administrator, custodian, trustee or administrative receiver is appointed over the whole or any material part of its undertaking, property or assets, (iv) if an order is made or resolution is passed for its winding up, otherwise than for the purposes of a solvent reconstruction or amalgamation, (v) if it applies for other measures of protection against its creditors under applicable bankruptcy or insolvency laws or (vi) if any event analogous to any of the foregoing occurs in any jurisdiction in which any of its assets are situated.

"Parties" means Syngenta and the Buyer.

"Products" means the products (including any instalments of the products or any parts of them) which Syngenta is to supply in accordance with the Contract, whose features and capacities are specifically described in the Contract. Products may include, without limitation, seeds, seedlings, rootstocks, cuttings, young plants and ornamental plants, for instance of the following crops: cereals, corn, sunflower, rapeseed, fodder beet, vegetable crops and flowers.

"Syngenta" means the Syngenta entity that has agreed to supply the Products to the Buyer under the Contract.

"Syngenta Group" means the Syngenta contracting entity, and/or any other company considered as a Syngenta Affiliate as per the definition given above.

The latest **International Seed Federation (I.S.F.) terms and definitions** describing the reaction of plants to pests and pathogens and to abiotic stresses for the vegetable seed industry are hereby incorporated by reference. If Syngenta uses these terms in these General Conditions of Sale and any related statements, the definition of I.S.F. applies.

2. Orders

2.1 Syngenta shall sell and the Buyer shall purchase the Products in accordance with:

- (i) any written order of the Buyer which has unconditionally been confirmed by Syngenta (including, without limitation, by delivering

some or all of the ordered Products); or

- (ii) any other written agreement between the Buyer and Syngenta; subject in either case to these Conditions which are applicable to the Contract.

2.2 Except for these Conditions, no terms and conditions which the Buyer purports to apply under any early order, purchase order, confirmation of order, specification or similar document will form part of the Contract.

2.3 The Buyer shall state in writing in its order and/or at Syngenta first request the data, specifications and documents legally required in the country of delivery, of, among others, the following:

invoicing;

- phytosanitary requirements;
- international certificates;
- other import documents or import declarations.

2.4 All orders which are placed with Syngenta through Syngenta's electronic ordering system are equally subject to these Conditions, as well as any further specific terms and conditions which may be posted within and/or are downloadable from such system.

2.5 Syngenta reserves the right to amend these Conditions from time to time.

2.6 No order which Syngenta has confirmed in accordance with Condition 2.1(i) can be cancelled by the Buyer except with Syngenta's written agreement.

2.7 If Products ordered under the Contract have not yet been delivered or paid for, Syngenta may terminate the Contract immediately by notice in writing to the Buyer if an Insolvency Event or Change of Control occurs in relation to the Buyer.

3. Delivery

3.1 Any dates specified by Syngenta for Delivery of the Products are approximate only and do not constitute a deadline.

3.2 The quantity of any shipment of Products as recorded by Syngenta or its (sub-)contractor upon dispatch from Syngenta or its (sub-)contractor's place of business shall be conclusive evidence of the quantity received by the Buyer on delivery unless the Buyer can provide conclusive evidence proving the contrary.

3.3 In the case of a non-delivery of the Products written notice of the non-delivery is given to the carrier and Syngenta by the Buyer within fourteen (14) days of the date when the Products should have been received. If the Buyer does not inform Syngenta and the carrier of the non-delivery within this period, the Buyer's rights to hold Syngenta liable for the non-delivery will lapse.

3.4 Any liability of Syngenta for non-delivery of the Products shall be limited to replacing the Products within a reasonable time or issuing a credit-note at the pro-rata Contract rate against any invoice raised and paid for such Products.

3.5 A signature of qualified acceptance on a carrier's delivery note shall not be written notice to either the carrier or Syngenta for the purpose of these Conditions.

3.6 Syngenta is permitted to deliver the sold Products in instalments. If the Products are delivered in instalments, Syngenta has the right to invoice each partial delivery separately.

3.7 If the quantity mentioned in an order deviates from the standard quantity applied by Syngenta or a multiple thereof, Syngenta has the right to deliver the nearest higher quantity being, as applicable, the standard quantity applied by Syngenta or a multiple thereof.

3.8 Return deliveries, including the mutual exchange of seeds for pelleted seeds, are not permitted, unless agreed in advance between the parties in writing.

3.9 If for any reason:

- (i) production (including harvesting and processing) of any Products

shall fail to provide Syngenta with Products of sufficient quantity and/or quality for Delivery to the Buyer, or

- (ii) at any time total demand for Products shall for any reason exceeds Syngenta's total available supply through its normal sourcing arrangements,

Syngenta shall not be under an obligation to deliver the quantity ordered by the Buyer and the Products to be supplied under the Contract shall be such quantity as Syngenta shall in its sole discretion allocate to be supplied under the Contract, and Syngenta shall not be in breach of the Contract, negligent or otherwise liable to the Buyer (and the Buyer shall not be entitled to any damages) if such quantity is less than the quantity ordered by the Buyer.

3.10 Young plants and ornamental plants are delivered in a special (design copyrighted) tray(s) and, depending on the quantity, loaded on a pallet(s) which shall both remain Syngenta's property. The Buyer acknowledges that Syngenta holds all design and property rights related to the tray(s) and undertakes to act in compliance with these rights. The Buyer shall take due care of these tray(s) and pallet(s) until they are collected by Syngenta. The Parties shall make agreements with regard to the frequency with which the tray(s) and/or pallet(s) are collected by Syngenta. If these tray(s) and/or pallet(s) are lost or damaged whilst in the Buyer's possession or control, the Buyer shall be liable to pay to Syngenta an amount of € 5 per tray and € 12.50 per pallet. The Buyer shall store the tray(s) and/or pallet(s) in such manner that Syngenta can collect them in a normal manner. The Buyer shall ensure that the tray(s) and/or pallet(s) are clean. In order to guarantee Syngenta's property rights the trays are individually numbered and registered by means of a barcode. The Buyer will not remove or otherwise render illegible this barcode and should the Buyer do so the Buyer shall pay to Syngenta an amount of € 1 per tray, without prejudice to Syngenta's right to claim a higher amount in damages from the Buyer.

3.11 The Buyer is not permitted to continue to use the tray(s) and/or pallet(s), or to let them be used by third parties, unless explicitly agreed otherwise by Syngenta in writing.

3.12 If no agreements have been made between the Buyer and Syngenta about shipment, Syngenta shall have the right to ship the consignment in the manner it deems best. The shipment is entirely for the Buyer's risk. Any additional costs as a consequence of the Buyer's special transport and/or packaging requirements shall be charged to the Buyer's account.

4. Price and Payment

4.1 The price of the Products shall be Syngenta's quoted price, or when no price has been quoted (or a quoted price is no longer valid), the price set out in Syngenta's most current published price list at the date of Delivery. Syngenta reserves the right to modify its prices periodically and in the interim. Each new price listing shall cancel the previous price with regard to orders placed after such new price listing.

4.2 The price of the Products is exclusive of any value added tax or any other applicable tax (which the Buyer shall pay in addition when it is due to pay for the Products) and further costs to be paid by the Buyer, including amongst others, packaging cost, quality assurance costs and/or phytosanitary inspections, import duties, government and other regulatory levies, and any other fees. Prices are expressed in Euros and shall be paid in Euros, unless otherwise indicated in the invoice.

4.3 Syngenta shall invoice the Buyer for the price of the Products. Syngenta shall determine the date of issuing such invoice in compliance with relevant local regulations.

4.4 Each invoice for the price of the Products will be paid within 30 days after the invoice date at Syngenta's offices or by deposit or transfer into a bank account indicated by Syngenta.

4.5 The Buyer shall make all payments due under the Contract without any deduction whether by way of set-off, counterclaim or otherwise unless the Buyer has a valid court order requiring an amount equal to such deduction to be paid by Syngenta to the Buyer.

4.6 If the Buyer fails to make any payment under the Contract on the due

Terms

date (without any prejudice to its other rights or remedies), the Buyer is in default. In the event of late payment for deliveries made in the Netherlands, the Buyer shall pay 1% of the interest per month or per part of a month on the invoice amount as of the time at which the Buyer is in default. In the event of late payment for deliveries outside the Netherlands, the Buyer shall pay 1.5 % per month or per part of a month on the invoice amount as of the time at which the Buyer is in default. In the event of the Buyer's defaults, Syngenta has the right to charge any exchange rate loss incurred as a result to the Buyer's account.

4.7 If payment in instalments has been agreed, the entire remaining amount shall be immediately payable, in the event of late payment of an instalment. The stipulations of Condition 4.6, shall apply by analogy.

4.8 Without prejudice to its other rights and remedies, Syngenta shall have the right to immediately cancel any orders accepted by Syngenta, or to delay the delivery of Products ordered therein, if the Buyer's account with the Syngenta Group shows that the Buyer is overdue in paying any Syngenta invoices.

4.9 If the Buyer is in default with regard to one or more of its obligations, all extra judicial collection costs incurred to obtain payment as well as judicial costs shall be for the Buyer's account, with a minimum of the invoice amount.

4.10 Syngenta reserves the right to not carry out, or no longer carry out, orders or agreements if previous deliveries have not been paid for by the Buyer or the Buyer has not fulfilled or it's at risk of not fulfilling his obligations to Syngenta. The Buyer is required to pay the damage suffered by Syngenta due to this. Syngenta is not responsible for any damage suffered by the Buyer as a result of not carrying out orders.

4.11 If there is any doubt at Syngenta's discretion regarding the ability of the Buyer to pay, Syngenta will be entitled to defer performances until the Buyer has provided surety for the payment. If the Buyer has not provided surety for the payment within fourteen (14) days after being requested to do so, Syngenta is entitled to terminate the agreement by cancellation. In this case the Buyer will be liable for expenses incurred by Syngenta.

5. Property and Risk

5.1 Ownership of the Products shall only be transferred to the Buyer once they have been fully paid for and the Buyer has fulfilled all of its other obligations towards Syngenta. Payment refers to the full payment of the invoiced price, including value added tax, applicable interest and any other costs as stated in Condition 4.2. The above stipulation shall apply irrespective of the manner in which the delivered Products or the Products resulting from them have been planted and/or connected to a medium and/or substrate.

5.2 Products delivered by Syngenta, covered by the retention of title pursuant to Condition 5.1, can only be resold or used in the framework of ordinary business operations. In the event that the Products are resold by the Buyer, the Buyer shall require from its buyers a retention of title and, to ensure by means of a perpetual clause to be imposed, that third parties undertake to immediately send Syngenta the records of consignment numbers of the Products, so that all the delivered Products can be traced to third parties.

5.3 The risk of damage to or loss of the Products shall be borne exclusively by the Buyer as from their Delivery.

5.4 For Products which have been supplied but not yet paid-for, the Buyer shall hold the Products on Syngenta's behalf and shall keep the Products separate from those of the Buyer and third parties, shall sufficiently insure the Products against loss and/or damage and shall identify the Products as Syngenta's property. At Syngenta's request, the Buyer shall provide proof that it has subscribed to an insurance policy. Until the Buyer has paid for the Products in full, the Buyer undertakes to take all necessary measures in order to preserve the integrity and quality of the Products. The Buyer is not permitted to encumber the Products or to vest any other rights in them.

5.5 The Buyer's right to possession of Products belonging to Syngenta will cease immediately if an Insolvency Event occurs in relation to the Buyer. Where the Buyer's right to possession has terminated, the Buyer grants Syngenta, its agents, employees and Affiliates irrevocable permission at any time to enter any premises where the Products are or may be stored to recover them. This Condition 5.5 will survive termination of the Contract

for any reason.

6. Terms of use of the Products and usage

6.1 Instructions setting forth the restrictions of use of the Products by the Buyer and subsequent buyers may be included in the Products' packaging and/or labelling. By using the Products, the Buyer or further buyers confirm his/their commitment(s) to comply with these restrictions. The Products are exclusively intended for the growing of crops for human or animal usage and/or consumption. The Products and the packaging are proprietary to Syngenta Group or its licensors and are protected by intellectual property rights. Unless otherwise agreed in writing, the Buyer's use of the Products is limited to production of a single commercial crop, whether of fresh produce, forage, fiber, grain or any other crop. In the preceding sentence, "production" shall exclude producing seeds for replanting or vegetative reproduction. Unless expressly permitted by law, use of the seed, including the parental lines that may be unintentionally contained therein, for research, breeding or molecular or genetic characterization is strictly prohibited. Buyer has and shall acquire no rights in relation to parental lines that may be unintentionally contained therein. In the case of the Products being ornamental plant culture products for which plant breeder's rights have been applied for and/or granted, only non-recurring flower or plant production is allowed. Violations shall result in an immediately payable penalty of € 1.00 per reproduced flower or plant. Besides the penalty Syngenta shall retain its right as a licence holder to recover the actually incurred damage from the violating party. Buyer further agrees not to remove the bag-tag and/or labelling from the Products' packages and/or labelling.

6.2 The Buyer shall impose no less stringent restrictions than the restrictions mentioned in this Condition 6 upon its own buyers.

7. Access to premises

The Buyer shall, if requested, give Syngenta, its agents, employees and Affiliates access to its premises where the Products are located at any time to enable Syngenta to inspect the usage of such Products. Syngenta shall notify the Buyer of its visit in a timely manner.

8. Packaging and traceability of Products; use of trademarks, signs and other indications

8.1 **Use of trademarks, signs and other indications.** All of the trademarks, service marks and logos displayed on the Products, in the Contract and/or in any document or website referenced by them (the "Trademarks") are registered and unregistered trademarks of the Syngenta Group, or third parties who have licensed their trademarks to the Syngenta Group. Buyer shall not reproduce, display or otherwise use any Trademarks without Syngenta's prior written permission.

Unless agreed otherwise in writing, the Buyer is not permitted to use Trademarks, signs and other marks used by Syngenta, for its own products or services, nor to suggest a (direct or indirect) commercial connection with the Syngenta Group, with the exception of trading the Products in their original packaging on which Trademarks, signs and other marks have been applied by Syngenta. If the delivered Products are resold, this restriction shall also be imposed upon the Buyer's own buyer and to any subsequent buyers.

8.2 **Packaging.** The Buyer shall not change or remove the Trademarks (including, without limitation, corporate or trade names and labels, any bag tag, or any indication of any intellectual property right of any nature whatsoever belonging to Syngenta), from the packaging of the Products, unless with prior written permission by Syngenta.

8.3 **Traceability.** The Buyer hereby acknowledges that any marketing of a Product on which any of the label, batch number, bag tag or sell-by date have been removed, erased or altered, represents a serious breach of these Conditions and of the Contract. Such breach shall entitle Syngenta in its sole discretion to terminate the Contract immediately without any compensation whatsoever in Buyer's favor. In such a case, the Buyer shall bear all the legal, financial and judicial consequences which may arise therefrom, at its sole expense and risk.

9. Plant Breeders' rights and other intellectual property rights

9.1 The Buyer shall comply with the restrictions and limitations imposed on the Products by the UPOV Convention and its national implementations which are hereby incorporated by reference, and when applicable Council Regulation No 2100/94 of 27 July 1994 on Community plant variety rights, which are also hereby incorporated by reference.

9.2 Products protected by a breeder's right applied for or granted in the Netherlands or any other country or by a contractual transfer provision may not be used to further reproduce the variety.

9.3 Buyer shall comply with these additional obligations:

(i) If the Buyer finds a mutant in the Products, the Buyer shall report this immediately to Syngenta by registered letter, and shall make available to Syngenta materials of the mutant for testing purposes and for any other purposes without charge. Furthermore, if the Buyer maintains the mutant, Syngenta has the right to request from the Buyer, within a period of two (2) years after the detection of the mutant, materials of the mutant for testing purposes and for any other purposes without charge. The Buyer shall ensure that this Condition 9.3(i) also applies to its customers, who shall then exercise their reporting obligation to the Buyer.

(ii) The Buyer shall indemnify Syngenta for any damages Syngenta has incurred as a result of any violation by the Buyer of Syngenta's plant breeder's rights or other intellectual property rights.

(iii) The Buyer undertakes to fully cooperate as desired by Syngenta, including cooperating with the collection of evidence, in the event that Syngenta is engaged in legal proceedings with regard to plant breeder's rights or other intellectual property rights.

(iv) The Buyer shall report all sales of Products as may be required by relevant royalty collecting agencies administering rights in the Products. If the Buyer is a licensee of Syngenta the Buyer shall ensure that its sub-licensees, where relevant, also comply with this Condition 9.3(iv).

10. Statement related to Genetically Modified Organisms

All the Products currently sold by Syngenta in Europe, Africa and the Middle East have been bred by conventional plant breeding methods and with parent components that have not been genetically modified, without using genetic modification techniques leading to genetically modified organisms as defined in Directive 2001/18/EC on the deliberate release into the environment of genetically modified organisms. The methods and processes used in the development and maintenance of those varieties are aimed to achieve high purity standards and minimizing the risk of off-types or adventitious presence of other plant material, including genetically modified material, as defined by the applicable laws or regulations. Seed production has been carried out in accordance with existing requirements related to marketing of varieties and seed production rules including specified isolation distances. The Buyer acknowledges that, although unlikely, the risk of adventitious presence of genetically modified organisms cannot however be totally excluded.

11. Warranty

11.1 Syngenta shall make its best efforts for the Products to conform to their specifications and labels as much as possible, provided that they are handled by the Buyer with utmost care. No guarantees apply to the product specifications.

11.2 The Buyer shall check upon Delivery of the Products the condition of the Products and absence of visible defects of the Products, and shall bear the expenses and assume the risks related to such inspection.

11.3 Any claim or reservation regarding visible defects (such as but not limited to differences in weight, defective packaging, errors in the numbers of parcels or packages, exterior appearance), shall be made on the carrier's receipt and confirmed by registered letter with acknowledgment of receipt, sent to Syngenta within five(5) working days as from the Delivery of the Products, with the exception of seed trays and young plants for which claims shall be submitted within forty eight (48) hours of their Delivery. The Buyer shall specify and justify the nature of its claim or reservation, and identify the defective Products by their batch number.

11.4 Any claim regarding invisible defects as of the time of Delivery (such as but not limited to moisture content, specific purity, seed coating and grading, germination rate, trueness to type) shall be made by Buyer by registered letter with acknowledgment of receipt within five (5) working days from the discovery of such invisible defect and/or from the time at which the Buyer could reasonably have discovered the defect, but in no event no more than one (1) year from Delivery, after which Buyer shall be barred from asserting such a claim, and Syngenta may no longer be held liable for, defective Products.

11.5 Syngenta shall not be held liable for any defect under Conditions 11.3 or 11.4 unless (i) Buyer has notified Syngenta following the relevant conditions set forth in this Condition 11, and (ii) Buyer has provided Syngenta after receipt of the notice with a reasonable opportunity to examine the Products. In all cases, Syngenta shall not be held liable under the abovementioned conditions if (i) the Buyer has not used the Products in the ordinary course of business (in accordance with Condition 6 above), (ii) has modified them in any way whatsoever, (iii) has not stored, kept and handled them so as to ensure that they remain in a good state of conservation and/or (iv) if the defects did not exist at the time of Delivery.

11.6 If the Products have been delivered showing visible defects and (i) the Buyer has notified Syngenta following the relevant conditions set forth in

this Condition 11 and (ii) the Buyer has provided Syngenta after receipt of the notice with a reasonable opportunity to examine the Products, Syngenta shall be entitled at its option to either replace the Products (or the defective part) free of charge or, if the Products have already been paid for, refund the price of such Products (or a proportionate part thereof) by issuing a credit note at the pro-rata Contract rate.

11.7 In the event of a lasting dispute between the parties with regard to the germination capacity, the pedigree, the purity of the race and/or the technical purity, a (re) inspection can be carried out by the NAK Tuinbouw, which has its offices in Roelofsarendsveen, the Netherlands, at the request of one of the Parties, for the account of the Party found to be in error. The results of this (re) inspection shall be binding for both Parties, without prejudice to the parties' right to submit disputes regarding the consequences of such results to the institutions mentioned in the Condition 17.

12. Exclusion, Limitation of Liability and Indemnification.

12.1 The following provisions of this Condition 12 and Conditions 11 and 3 set out the entire liability of Syngenta (including any liability for the acts or omissions of its employees, agents and sub-contractors) to the Buyer in respect of:

(i) any breach of these General Conditions of Sale; and

(ii) any representation, statement, tortious act or omission, or negligence, arising under or in connection with the Contract.

12.2 The Buyer shall mitigate any and all loss and damage in relation to which the Buyer lodges a claim against Syngenta under the Contract.

12.3 All warranties, conditions and other terms implied by statute or law are excluded from the Contract as far as legally possible.

12.4 Subject to maximum extent permitted under applicable law:

(i) Syngenta's total liability in contract, tort (including negligence and breach of statutory duty), misrepresentation or otherwise, arising in connection with the performance or contemplated performance of the Contract shall be limited to the Contract value (net of value added tax); and

(ii) Syngenta shall not be liable to the Buyer by reason of any representation or any implied warranty, condition or other term or any duty at law or under the express terms of the Contract for any indirect, consequential, incidental or special loss or damage, costs, expenses (whether or not Syngenta has been advised of the possibility of such loss, damages, costs or expenses), or any claims for consequential compensation, howsoever caused (including without limitation caused by the negligence of Syngenta or its employees, Affiliates, agents or sub-contractors), which arise out of or in connection with the Contract;

(iii) Syngenta shall not be liable to the Buyer for any loss of profit, loss of business, loss of business opportunity, loss of revenue, depletion of goodwill howsoever caused (including without limitation caused by the negligence of Syngenta or its employees, Affiliates, agents or sub-contractors), which arises out of or in connection with the Contract.

12.5 The Buyer shall hold harmless and indemnify Syngenta against any and all claims of third parties for damages which have been caused by or are otherwise connected with any Products delivered by Syngenta, including, without limitation, claims made against Syngenta in its capacity as producer of the Products pursuant to product liability, unless such damage is caused by gross negligence or wilful misconduct on the part of Syngenta. The Buyer undertakes to subscribe to and maintain an appropriate insurance against claims arising from the indemnification provided for in this Condition 12.5, and an insurance certificate shall be submitted to Syngenta at Syngenta's first request.

12.6 All information given in Syngenta's catalogue or otherwise provided by Syngenta, or by any agent or representative on Syngenta's behalf, relating to the Products, including but not limited to varieties, varietal characteristics or periods of maturity or otherwise relating to the performance of the Products and cultivation advice, is given for general guidance only. Buyer agrees that any information so given or provided does not constitute a representation or warranty by Syngenta as to any matter and shall not be relied on as such. The Buyer itself shall assess whether the Products and/or information is suitable for application to the envisaged cultivation respectively under local conditions.

12.8 Each possible claim regarding compensation for damages pursuant the Contract expires, if and as soon as one year has passed since the delivery of the Products in question when the claim has not been submitted to Syngenta in writing.

13. Stewardship

The Buyer agrees to (i) engage only properly instructed, qualified personnel

with the appropriate handling of the Products and to (ii) follow at all times applicable safe use and disposal practices as recommended by Syngenta or international organizations, and (iii) use the Products only for their intended purposes.

14. Compliance with applicable Laws

The Buyer confirms that it will at all times comply with applicable local and international laws, sanctions and regulations.

15. Force Majeure

15.1 Syngenta shall not be liable to the Buyer in any manner or deemed in breach of the Contract because of any delay in performing or any failure to perform any of Syngenta's obligations under the Contract if the delay or failure was due, or in response to a Force Majeure event. Force Majeure means any cause beyond Syngenta's or its contractor's reasonable control, that could not, or which effects could not have been reasonably prevented. For instance, the total demand for Products exceeding for any reason Syngenta's total available supply through its normal sourcing arrangements shall be interpreted as a Force Majeure event.

15.2 Syngenta shall notify the Buyer as soon as possible if Syngenta is unable to deliver or unable to deliver in a timely manner due to Force Majeure.

15.3 If the situation of Force Majeure continues for more than two (2) months and the Parties have not agreed on a change to the Contract, both Parties shall have the right to dissolve the Contract. In such instances Syngenta shall not liable to pay any damages.

16. Confidentiality

The Buyer shall hold in strict confidence any and all information about the Products, the know-how and trade secrets of Syngenta and its business, irrespective whether the source of such information has been Syngenta or one of its Affiliates or a third party, or whether such information was found, developed, or generated by the Buyer itself. In particular and without limitation to the foregoing, turnover figures (notwithstanding Condition 9.3(iv)) and measures for sales promotion shall not be communicated to third parties. The Buyer shall ensure that its own buyers comply with the obligations set out in this Condition 16. This Condition 16 will not apply to information that is in the public domain except where this is as a result of any breach of this Condition 16.

17. Applicable Law

Any Contract between Syngenta and the Buyer shall be governed by law of the Netherlands. The competent Court of Amsterdam or, at Syngenta's discretion, any other competent court according to applicable law, is exclusively competent. The United Nations Convention on Contracts for the International Sale of Goods is expressly excluded from these Conditions.

18. Severability

Any provision of the Contract and/or the Conditions which is held by any competent authority to be invalid, void, voidable, unenforceable or unreasonable (in whole or in part) shall to the extent of such invalidity, voidness, voidability, unenforceability or unreasonableness be deemed severable and the other provisions of the Contract and/or the Conditions and the remainder of such provision shall not be affected. Syngenta and the Buyer shall in that case use their best efforts to negotiate valid and enforceable substitute provisions and/or the Conditions for those declared invalid or unenforceable, in order to carry out as far as possible the original intent and the purpose of the Contract and/or the Conditions.

19. Protection of personal data

In the performance of any offer or agreement between the Parties, each Party will comply with data protection law ("Data Protection Law"), if and to the extent that the processing of personal data plays a role. For the purposes of this Condition, Data Protection Law means laws, provisions, regulations (including but not limited to General Data Protection Regulation (Regulation (EU) 2016/679), AVG), and - to the extent that they are generally binding - precedents, rules, standards and other similar instruments, as applicable to a Party's data processing.

December 2019

A close-up photograph of a cluster of small, white, five-petaled flowers on a green stem. The flowers are in various stages of bloom, with some showing yellow stamens. The background is a soft, out-of-focus green. The Syngenta logo is visible in the bottom left corner.
