

Inca II

Tagetes erecta

Long or short days, Inca II delivers.

Inca II is an intermediate type Marigold with very early flowering and less day length sensitivity. It achieves a medium height in the garden and performs well even in hot conditions.

- Well-branched plants with large double blooms meet the market demand for showy, retail-ready containers.
- Early flowering, even under increasing day lengths, make Inca II easily adaptable for both early or late spring production.
- An outstanding choice for color and fill in sunny landscape applications.

Inca

Tagetes erecta

The leading variety for the pot and bedding plant market in South East Asia.

Well known for the high quality flowers, good germination, the large flower production and the strong stems.

- Inca is the most disease tolerant series, which is experienced especially under adverse weather conditions. Your best choice for a successful production!
- Available in Orange and Yellow.

Perfection

Tagetes erecta

An impeccable garden beauty.

Perfection is the landscaper's Marigold of choice for color and height in the garden. It can make hedges up to 75 cm tall covered with fully double flowers.

- Sturdy plants work well in larger pots and provide instant retail and garden color.
- Large, double flowers are long-lasting, shed water easily, and exhibit superior weather tolerance.

Duchess

Torenia fournieri

Fit for royalty.

Tight, mounding habits are ideally suited for bedding plant production.

- Early to flower, compact, and uniform for both flowering time and plant habit.
- Works well in mixed containers and is great for both sunny and shady garden beds.
