

Obsession

Verbena Hybrida

Color that will mesmerize.

Obsession has a compact and branched habit ideal for high density production and shipping. It is early, uniform, multi-branching and very floriferous. Its wide range of colors including 'eyed' varieties attract impulse sales, and its strong tolerance to powdery mildew helps ensure consumer satisfaction.

- Perfect for packs and small pots with strong branching and high uniformity that make production a breeze.
- Very early with fast follow-up flowering, so plants stay in bloom longer
- Available in unique twister patterns previously found only in cuttings and a wide range of other bold colors and top notch mixes.

Obsession Twister

Verbena Hybrida

High density with a twist.

The unique Twister flower pattern, invented by Syngenta Flowers in vegetative Verbena, is now available in seeds. Like the rest of the Obsession series, the Twister colors are very early flowering on naturally compact plants ideal for high density pack and pot production.

- Long shelf-life at retail.
- Strong tolerance to Powdery Mildew in the garden.

Obsession Cascade

Verbena Hybrida

First and only trailing Verbena from seed.

Obsession Cascade is a new class of seed verbena with a spreading and mounded habit ideal for automated production in large packs and small pots, for landscape use, or for high volume retail promotions in single crop or combination baskets. Plants are well branched, requiring no pinch.

- Bred to be very tolerant to Powdery Mildew, Obsession Cascade will continue to perform and flower in the garden well after many other varieties have succumbed to disease.
- Seed product form offers easy, no-pinch production with all the efficiencies that come with mechanized handling of seed grown plants.
- Ideal for value added baskets and combinations.
- Excellent powdery mildew tolerance.
