

# Primera

Primula acaulis

## First of the season.

Primera is bred for exceptionally short production under almost any circumstances for sales from September through February!

- Bred for early production from September through February, but can also be slotted through the entire primrose season.
- Minimal cool temperatures required to initiate flowering.
- Uniform plants and flowering, with large showy blooms. Compact habit fill pots with tidy, rounded leaves.

# Orion

Primula acaulis

## The reliable winter performer.

Orion is a standard type Primula acaulis, bred for Mid-early season production - sales from beginning January through March.

- The series has large flowers and excellent uniformity between the colors. Its round shaped habit makes the Orion series ideal for production in 9-12 cm pots.
- Very uniform flowering reaction between all colors.
